Maximize the likelihood of a successful switch by transitioning your patients onto the only generic with the same inhaler device as the reference brand.

pms-FLUTICASONE PROPIONATE / SALMETEROL DPI (dry powder inhaler) (fluticasone propionate/salmeterol) is a combination of an inhaled corticosteroid (ICS) and a long-acting beta₂-adrenergic agonist (LABA) indicated for the maintenance treatment of asthma in patients with reversible obstructive airway disease.

pms-FLUTICASONE PROPIONATE / SALMETEROL DPI (dry powder inhaler) 250 mcg and 500 mcg are indicated for the maintenance treatment of chronic obstructive pulmonary disease (COPD), including emphysema and chronic bronchitis, in patients where the use of a combination product is considered appropriate.

Please consult the Product Monograph at <https://health-products.canada.ca/dpd-bdpp/index-eng.jsp> for important information relating to warnings, precautions, directions of use, and dosing information that has not been discussed in this piece.

The Product Monograph is also available by calling us at 1-888-550-6060.

A **NEW** product for maintenance treatment of asthma, brought to market by Pharmascience

Pharmascience is a leading Canadian manufacturer of prescription, over-the-counter, and behind-the-counter generics and has a portfolio of more than 2,000 products. It is one of only two companies launching a generic maintenance treatment for asthma, and the only company offering an inhaler device that both you and your patients will be familiar with.
